

## Siker Video Information Sheet

---

Our 10-minute bespoke videos will take you through the basics of cyber security for Operational Technology and Industrial Control Systems. The script and graphics can be changed to meet your own needs.

---

### **How IT operations can affect OT systems.**

Our animated character explains IACS and OT systems. You will learn how OT systems are connected to IT systems and the impact of this.

### **What happens if the system fails.**

Our character explains the consequence of an OT system failure.

### **How a virus can spread from one OT system to another and what you can do to reduce this risk.**

We look into Malware and how it can affect other computers across the network. Memory sticks, portable hard drives and laptops are also covered.

### **How your company OT systems are protected and what you staff can do to avoid cyber security incidents.**

Our animated character explains IACS and OT systems. You will learn how OT systems are connected to IT systems and the impact of this.

## **Siker Video Information Sheet**

---

**Our video production service includes the following:**

- Apply changes to the script and storyboard
- Update graphics to reflect company branding
- Audio narration
- Synchronise animation to new audio
- Deliver as MP4 video animation

All videos are produced in English with the option to translate and record (or subtitle) in most other languages.

---

### **Pricing**

Prices vary dependent on changes to text and graphics.
